

Table iD®

Accurately comp players and eliminate manual tasks.

Table iD® is the most advanced and flexible table game solution on the market.

Table iD® is the first fully automated system that maximizes comping accuracy, increases productivity, and delivers compelling Bonusing to table players. *Table iD* combines table management software, radio-frequency identification (RFID) chip tracking, Bonusing, and image-based card recognition into one comprehensive solution. Improve the profitability of your entire table game operations with *Table iD*.

Benefits:

- More advanced and flexible than any other table game automation system available
- Three modules of integrated technology bring combined efficiencies to your operation
- Brings the power of the open network to your tables
- Open interfaces to most other casino management systems make integration easy
- Built on *Microsoft® SQL Server®* 2005 technology for enhanced performance, availability, scalability and security
- Fully integrated with the *IGT Advantage®* system

Table iD®

Table iD® modules include:

Table Manager

- Automate player tracking at the table
- Eliminate manual tasks and streamline your operations

Chip Manager

- RFID chip tracking for automatic bet recognition
- Ensure accurate ratings and player worth calculations

Table Bonusing

- Bring the proven value of Bonusing to table games players
- Add excitement, drive play and create a competitive advantage for your property
- Table bonuses available now include:
 - **Lucky Seat** – randomly select a player rating based on criteria you set
 - **Lucky Draw** – carded table players earn tickets to a virtual drawing

A powerful combination that brings maximum efficiency to your operation.

Installed in more than 90 casinos worldwide.

Find out how you can get the proven advantage. For more information, contact your IGT Account Executive today.
