

*EZ Safe*TM

The *EZ Safe* cash dispenser is a logical enhancement to the *EZ Route* system, designed to help increase payout security for route operators and smaller gaming sites by dispensing cash for *EZ Route* hand pays.

The *EZ Safe* cash dispenser connects directly to the *EZ Route* system and consists of a secure steel cabinet, NCR[®] bill dispensers for two-currency denominations, a user friendly touchscreen interface, and a report printer to create end-of-shift reports.

Exclusive EZ Safe™ Cash Dispenser Features...

- Reduces the amount of required unsecured cash on hand
 - Connects directly to the *EZ Route* system
 - Cash is only dispensed when a hand pay is verified by the *EZ Route* system
 - Based on the familiar Windows® operating system
 - Dispenses two different bill denominations
 - Each bill cassette stores up to 2,250 bills
 - Uses patented NCR bill dispensers
 - Lockable reject bin for added security
 - Operator-selectable maximum payout amount
- The controller features a unique Graphical User Interface (GUI) utilizing touchscreen operation
 - When an attendant logs off of the *CVT-Plus*, the dispenser automatically prints a shift summary of all bills dispensed during the shift

“EZ” Operation

The *EZ Safe* operator interface features a brightly illuminated touchscreen control panel. Easy-to-understand information displays and intuitive command buttons simplify every operation to improve customer service. The attendant need only log on and off of the *EZ Route CVT-Plus* terminal to begin and end a shift using the *EZ Safe* cash dispenser.

When a player cashes out at a gaming machine, a hand pay event is signaled at the *CVT-Plus* terminal. Once the attendant verifies the hand pay, the *EZ Safe* mechanism automatically dispenses cash in an amount equal to – or just less than – the actual cashout amount. The user interface then shows the attendant the total payout, the amount of cash dispensed, and any remaining odd balance owed to the customer.

When the attendant logs off of the *CVT-Plus* terminal at the end of a shift, the receipt/report printer automatically generates a transaction summary report. This report provides a summary of bills dispensed by denomination, and lists the total value of all currency dispensed. Other *EZ Route* reports are available through the Reports menu of the *CVT-Plus* terminal.

The Cash-Dispensing System

The *EZ Safe* cabinet contains two state-of-the-art cash dispensing cassettes, manufactured by NCR® – the leading name in cash-dispensing technology. The safe also contains a lockable reject bin for rejected or misfed bills.

Each cassette holds up to 2,250 bills of any denomination, typically 100s and 20s. The spring-loaded money tray assures smooth bill delivery and an accurate bill count. Each cassette embodies a set of uniquely positioned magnets that enable the cash dispenser to recognize the currency denomination of the cassette,

thus preventing cassettes from being accidentally inserted into the wrong slot.

The compact, slim-line control panel tilts for easy viewing and operation, and mounts conveniently on a bar top, counter top, or on the wall. Familiar Windows® operating system commands and a touchscreen Graphical User Interface (GUI) make the control panel feel natural to the operator.

The control panel connects to the *EZ Safe* cash dispenser that in turn is connected to the *CVT-Plus*

terminal. The control panel provides ready access to all *EZ Safe* functions and information displays. In addition to viewing current cashout events, the operator may scroll through and review previous cashout events.

Currency is only dispensed when the *EZ Safe* mechanism is activated by a system payout. This greatly reduces the amount of cash that must be held by change personnel.

The large capacity of each *EZ Safe* cash dispenser – 2,250 bills per cassette – reduces the frequency of expensive currency deliveries to your sites, resulting in what may amount to a substantial savings for your operation.
